### PK-80

## **Rotary Pump**

EQUIPMENT

Characteristic	Area of Application / Media			Transportation / Installation	
	<b>E3</b> flammable	<b>E10</b> diesel / fuel oil / mineral oil			

#### **Application Areas and Installation**

It is recommended to deliver diesel/fuel oil and liquids which don't etch the material of the pump. The rotary pump PK-80 is a compact pump, which is used for spare and irregular delivery flow and media mixed with air. Flow volume up to 50 litre/min; delivery head up to 40 meters, manometric suction lift up to 9 metres;

temperature of the medium to be pumped up to  $+90^{\circ}$ C ( $+55^{\circ}$ C for diesel-/fuel oil), ambient temperature up to  $+40^{\circ}$  insulation class: F, protection class: IP 44

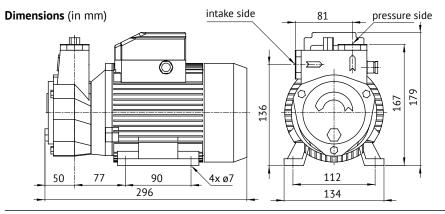

Please note: Installation in closed rooms and in any case weather protected.

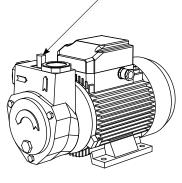

Before initial start-up, fill the pump body and also the suction line with the liquid to be pumped via the sprue hole. After filling, close the opening again.

Туре	Flow volume l/min.	Delivery head mWs	Voltage V	Current A	Frequency Hz	Engine power kW		Connection pressure side	
PK-80-015	43	5	230	5,0	50	0.6	1"	1"	11.6
	11	30	230						
PK-80-016	43	5	400	2,0	50	0,6	1"	1"	10,8
	11	30							

volume flow referring to 3-10 mm<sup>2</sup>/c (cSt) and length of the intake pipe = 1 metre
